(57) **ABSTRACT**

A pressurized paint brush assembly for attaching a paint brush to a paint sprayer includes a spray nozzle that is fluidly coupled to supply hose of a paint sprayer for receiving pressurized fluid paint from the paint sprayer. A hose is fluidly and removably coupled to the spray nozzle and the hose receives the pressurized fluid paint from the spray nozzle. A paint brush is included that has a fluid input and a plurality of bristles that is each in fluid communication with the fluid input. The fluid input is fluidly coupled to the hose such that the each of the bristles receives the pressurized fluid paint. In this way the paint brush can be attached to the paint sprayer to paint a surface.
